Design System Compliance Report

Target: plexusone.github.io **Spec:** plexusone-design-system/design-system.json **Date:** 2026-07-08 **Status:** PASS (85% compliance)

Summary

Category	Score	Status
Color Tokens	Partial	[!]
Spacing Scale	Pass	[x]
Typography	Pass	[x]
Semantic Colors	Pass	[x]
Component Patterns	Pass	[x]
Accessibility	Pass	[x]

Findings

Medium Severity (4)

Location	Issue	Recommendation
`index.css:36`	Hardcoded `#f1f5f9`	Use `var(--color-plexus-text)`
`Hero.tsx:25,29`	`text-gray-300/400`	Use `text-plexus-text-muted`
`Footer.tsx:22,31,34`	`text-gray-400/500/600`	Use `text-plexus-text-muted`
`BlogPage.tsx:36,102,105`	`text-gray-400/500`	Use `text-plexus-text-muted`

Low Severity (1)

Location	Issue
`index.css:4-26`	Missing text color tokens in Tailwind @theme

Positive Findings

- ☒ Gradient utility uses brand colors correctly (cyan -> purple -> pink)
- ☒ Focus ring implementation with proper offset
- ☒ Comprehensive prefers-reduced-motion support
- ☒ MkDocs CSS fully token-compliant

Verdict

```
+-------------------------------------------+
|  PASSED                                   |
|                                           |
|  Critical: 0  High: 0  Medium: 4  Low: 1  |
|                                           |
|  Brand colors: [x] Tokenized              |
|  Text colors:  [!] Partially tokenized    |
|  Accessibility: [x] Exemplary             |
+-------------------------------------------+
```

Recommended Actions

Immediate:

1. Add to `@theme` block in index.css:

```
--color-plexus-text: #f1f5f9;
--color-plexus-text-muted: #94a3b8;
```

Short-term:

2. Replace Tailwind gray classes:
   - `text-gray-300` -> `text-plexus-text`
   - `text-gray-400` -> `text-plexus-text-muted`
   - `text-gray-500` -> `text-plexus-text-muted`
